

Why Clinton is Better on Climate Change/Global Warming

The following is a letter from the scientific community sent to Congress in June of 2016.

Dear Members of Congress,

We, as leaders of major scientific organizations, write to remind you of the consensus scientific view of climate change.

Observations throughout the world make it clear that climate change is occurring, and rigorous scientific research concludes that the greenhouse gases emitted by human activities are the primary driver. This conclusion is based on multiple independent lines of evidence and the vast body of peer-reviewed science.

There is strong evidence that ongoing climate change is having broad negative impacts on society, including the global economy, natural resources, and human health. For the United States, climate change impacts include greater threats of extreme weather events, sea level rise, and increased risk of regional water scarcity, heat waves, wildfires, and the disturbance of biological systems. The severity of climate change impacts is increasing and is expected to increase substantially in the coming decades.

To reduce the risk of the most severe impacts of climate change, greenhouse gas emissions must be substantially reduced. In addition, adaptation is necessary to address unavoidable consequences for human health and safety, food security, water availability, and national security, among others.

We, in the scientific community, are prepared to work with you on the scientific issues important to your deliberations as you seek to address the challenges of our changing climate.

This letter was signed by over twenty five scientific organizations

The Republican's position on energy is to continue to promote the use of fossil fuels such as coal, natural gas and oil. There isn't any mention of climate change and its relationship to the burning of these fuels. Republicans continue to be the only climate-denying conservative party in the world.

We need a president who takes science and climate change seriously.
Hillary understands and will act on this issue.

"I WON'T LET ANYONE TAKE US BACKWARD, DENY OUR ECONOMY THE BENEFITS OF HARNESSING A CLEAN ENERGY FUTURE, OR FORCE OUR CHILDREN TO ENDURE THE CATASTROPHE THAT WOULD RESULT FROM UNCHECKED CLIMATE CHANGE."

HILLARY, NOVEMBER 29, 2015
