

# *Letter to the editor: Dangers of Project 2025*

*News and Advance, May 31, 2024*

## *Dangers of Project 2025*

*The stakes in the upcoming Presidential election have never been higher. Project 2025, if implemented by a second Trump administration, threatens the very foundations of our democracy. Our country was founded upon the principle of the separation of Church and State.*

*Project 2025, though, represents the antithesis of this foundational separation because it seeks to restructure our government on the basis of Christian nationalism. This would involve rolling back our ability, and that of our daughters and granddaughters, to make decisions about our own bodies and our own health; eliminating protections for diverse persons; politicizing the Justice Department and the FBI; eliminating the Department of Education; removing references in school curricula to the history of racism in our country as well as to our country's history of gender discrimination.*

*Project 2025 would also eliminate or severely reduce efforts at climate change and investments in clean and renewable energy. Consequently, a vote for Donald Trump as President would be a vote that takes us backward in the direction of fewer freedoms and democratic rights. Those who support Project 2025 are very serious about their goals. This should frighten all of us.*

*It is important that ALL eligible voters get out to vote on November 5th and vote against the implementation of Project 2025's destructive, discriminatory, archaic political and cultural agenda. The stakes in the upcoming Presidential election have never been higher. Project 2025, if implemented by a second Trump administration, threatens the very foundations of our democracy. Our country was founded upon the principle of the separation of Church and State. Project 2025, though, represents the antithesis of this foundational separation because it seeks to restructure our government on the basis of Christian nationalism. This would involve rolling back our ability, and that of our daughters and granddaughters, to make decisions*
